EDUCATION

San Diego State University

Bachelor of Science in Computer Science | GPA 3.56

San Diego, CA

December 2025

PROJECTS

Android App - Volume By Speed | Java

- Over 1000 downloads on Android devices and a 4.2-star rating
- App adjusts the volume of the device relative to the speed it's moving at. This technology is often found in newer cars to counteract road noise that takes away from the audio experience. My app makes this technology accessible
- The most recent update increased downloads by 34%, ad revenue by 58%, and reduced crashes by 96%

Unix Systems Administration Lab | OpenBSD, FreeBSD, Rocky Linux, Docker

- Extensive experience debugging and troubleshooting in the UNIX environment
- Designed and deployed a complete multi-VM private network from scratch, configuring DNS, PKI certificate authority, LDAP authentication, NFS file sharing, and mail services across seven operating systems
- Containerized web services using Docker and NGINX on Ubuntu; fault-tolerant with Kubernetes across multiple nodes
- Automated cross-system configuration using Ansible; deployed cloud infrastructure on Microsoft Azure with SSH and GitLab version control
- Gained hands-on experience with industry security concepts including firewalls, cryptography, centralized authentication, and system hardening on OpenBSD

Music Translator | Python, Claude Code, Fetch.ai, ElevenLabs

- Designed and built a full end-to-end audio translation system at DiamondHacks 2026 Hackathon, taking an input song and outputting a remixed audio file with translated vocals in the original singer's cloned voice
- Worked extensively with Claude Code to brainstorm, build, and debug
- Built a multilingual song translation pipeline using a Fetch.ai multi-agent system, where specialized AI agents negotiate translated lyrics to match the original's syllable count and stress patterns via weighted scoring across up to 4 revision attempts

Personal Portfolio Website - zerofour.tech | React, PHP, SQL

- Developed a personal website using React with modular, reusable components and custom styling; deployed and maintained on a self-managed server via cPanel, handling configuration and DNS setup.
- Incorporates a custom server-side email processing pipeline that parses incoming messages and stores and displays them via an SQL backend

EXPERIENCE

Youth Camp Counselor Lead and Sailing Instructor

April 2023 – Present

Mission Bay Aquatic Center

San Diego, CA

- As a Youth Camp Counselor Lead, I was responsible for leading a youth camp through safe, fun, and educational water sport activities. As a sailing instructor, I have learned how to better communicate ideas in a learning setting and have a greater ability to tailor activities to fit different learning styles and conditions. Worked extensively as a sailing instructor, teaching a variety of classes to any and all age groups and experience levels.
- Letter of Recommendation from Instructional Coordinator Jamie Eubanks

Boy Scouts of America | Eagle Scout

June 2011 – June 2022

Scouts BSA

Kenmore, WA

- As a Boy Scout for over 10 years, I learned the importance of good ethics, teamwork, and reliable leadership. I served as the Senior Patrol Leader for 6 months and organized weekly troop meetings.

TECHNICAL SKILLS

Concepts: UNIX System Administration, AWS, Debugging/Troubleshooting, Computer Architecture, Data Structures and Algorithms, Artificial Intelligence, Neural Networks, Machine Learning, Advanced Programming Languages

Languages: Python, C/C++, Java, JavaScript, SQL, MIPS Assembly

Developer Tools: React, AWS, Git

Skills: Leadership, Team Work, Public Speaking, Teaching
